

SUJAN DAHAL

SUMMARY

Full-stack developer specializing in creating intuitive product interfaces and robust API-driven workflows. Expertise in developing maintainable software architecture that enhances usability and scalability. Committed to making informed decisions that improve software safety and ease of release.

EXPERIENCE

Frontend And UI/UX Developer

Toolost | July 2023 - March 2026

- Designed UI/UX elements for improved user engagement
- Created intuitive product interfaces that improved user interaction and engagement.
- Implemented reusable interface patterns for product screens, forms, navigation, and feedback-heavy workflows.
- Developed and integrated frontend components that enhanced user interfaces.
- Implemented responsive UI designs for various devices
- Refined user paths by resolving unclear states, mobile behavior, validation gaps, and interaction edge cases.
- Aligned design, usability, and implementation constraints to ensure practical, maintainable releases.
- Built product-facing interfaces and workflows with attention to state, usability, and maintainable delivery.

Full-Stack Web Developer

AlphaTech | July 2022 - July 2023

- Delivered full-stack web features by connecting design handoff and integrating services, ensuring smooth release processes.
- Integrated REST-backed workflows in applications, enhancing user experience through predictable request and response states.
- Implemented service integration for enhanced application functionality.
- Developed component systems for efficient application architecture.
- Converted design handoff into reusable components that supported consistent implementation across screens.
- Coordinated state orchestration to effectively manage application status transitions, improving overall stability.
- Added targeted test coverage around release-sensitive flows to reduce regression risk.
- Ensured release quality through comprehensive testing protocols.
- Conducted critical path testing to identify major risk areas in software.

Frontend Lead

Cashback Holdings Pvt. Ltd. | February 2021 - July 2022

- Led frontend development team, improving user interface design for enhanced user engagement.
- Led interface architecture across commerce and fintech products with attention to service-backed states.
- Defined reusable frontend patterns for storefront, account, and transaction surfaces.

SKILLS

- React
- Next.js
- TypeScript
- Redux
- API Development
- REST APIs
- Responsive UI
- Figma to Frontend
- User-Centered Design
- Usability Testing
- Git
- Visual Feedback

EDUCATION

Bachelor of Science

Information Technology
Tribhuvan University, Kathmandu
May 2020

- Built commerce flows that connected product discovery, cart actions, validation, and checkout decisions.
- Designed fintech interaction states around trust, confirmation, recovery, and clear user feedback.
- Developed interface architecture for seamless product integration.
- Created state models to manage user interactions effectively.
- Managed ecommerce strategies, driving increased online sales through targeted optimizations.
- Facilitated crypto exchange operations, ensuring secure transactions and compliance with industry standards.

Frontend Developer

Supreme IT Solutions | November 2019 - September 2020

- Developed client-facing pages and components with practical structure, responsive layouts, and maintainable styling to enhance user experience.
- Developed frontend user interfaces for web applications.
- Developed responsive user interfaces for various devices.
- Streamlined UI patterns across client-facing pages for improved consistency and efficiency in delivery.
- Designed maintainable layouts and component structure based on business requirements to facilitate better collaboration and future scalability.
- Handled responsive behavior and visual polish so interfaces worked across common device sizes.
- Designed interactive elements to enhance user experience.
- Delivered reusable components for efficient development.
